QUALITY FOR HUMANITY

JUSE

Union of Japanese Scientists and Engineers

ABOUT JUSE

JUSE was established in May 1946 and authorized as the foundation of a juridical body by the Science and Technology Agency (reformed Ministry of Education, Culture, Sports, Science and Technology) of Japanese Government. The objective of JUSE is to promote systematic studies needed for the advancement of science and technology, whereupon to contribute to the development of culture and industry. The field of science and technology that JUSE has been involved in since its establishment belongs to the Soft Technology where the mathematical and statistical methods can be applied to the corporate management. Especially, the quality control has been the primary subject of JUSE and great efforts have been bent to the development and dissemination of the technology. Today, JUSE is widely known in and outside the country as a "Center of Quality Control in Japan". JUSE has managed the Deming Prize, which has been well known in the field of the Total Quality Management.

ABOUT TQMI

TQM International Pvt. Ltd. (TQMI) was established in July 1992. It is recognized as one of the leaders in the field of training and consultancy in Quality Management. It was founded by Janak Mehta who has spearheaded the QC movement in Indian since early 1980s and has gained international recognition for his work in business process improvement. TQMI has offices in India and providing services into the Gulf area since 1995. TQMI clients include many of India's top companies and multinationals in manufacturing and service business. TQMI has served over one thousand clients and many of them have given repeat assignments. TQMI serves its clients with 25 experienced counselors stationed in six cities in India. The key differentiator is TQMI's approach and the counselors' ability to facilitate deployment of various theories and concepts and demonstrate improvement in the field through pilot projects.

ABOUT DEMING PRIZE

The late Dr. W. E. Deming (1900 - 1993), one of the foremost experts of quality control in the United States, was invited to Japan by the Union of Japanese Scientists and Engineers (JUSE) in July 1950. Upon his visit, Dr. Deming lectured day after day his "Eight-Day Course on Quality Control" in Tokyo. Through these seminars, Dr. Deming taught the basics of statistical quality control plainly and thoroughly to executives, managers, engineers and researchers of Japanese industry. His teachings made a deep impression on the participants' mind and provided great impetus to quality control in Japan, which was in its infancy.

The transcript of the eight-day course, "Dr. Deming's Lectures on Statistical Control of Quality," was compiled from stenographic records and distributed for a charge. Dr. Deming donated his royalties to JUSE. In appreciation of Dr. Deming's generosity JUSE, proposed using it to fund a prize to commemorate Dr. Deming's contribution and friendship in a lasting way and to promote the continued development of quality control in Japan. Upon receiving the proposal, the JUSE's board of directors unanimously made a resolution to establish the Deming Prize.

The winners of the Deming Prize have amounted to 252 organisations in total, including 55 from overseas, till 2018

Dr. W. E. Deming (1900 - 1993)
